

## How to Download Music to your PSP

Can't seem to figure out how to download your favorite music to your Sony PSP? Ready to throw the stinking thing into the trash?

Here is a reliable quick and easy step by step procedure for putting the music you want and need on your PSP. There are only a few steps involved and it is incredibly simple for anyone to do.

1. First off you need to get what they call a cd ripper and while you are at it I would definitely grab a PSP video converter. A CD ripper lets you pull music (rip) of your CD's that you have now. The PSP video converter will let you rip and convert video files to watch on your PSP... So you can watch and listen to music videos and music, cool huh!
2. Load your CD and fire up your CD ripper select the song or songs you want to put on your PSP and hit the "extract and encode" to PSP.
3. If you already have music files on your pc then all you need to do is hit "add" from your CD ripper or psp video converter.
4. Make sure that for of the above steps you select the "PSP" format.
5. How can you download or transfer your music to PSP? Just connect your PSP with your PC with the USB cable, and copy your MP3 file(s) into the "H:\PSP\MUSIC" directory where H: would equal the drive of your PSP.

That's all you need. It is plain and simple to put music on your PSP! Now you can rock on to your favorite tunes with your favorite little PSP buddy...

Don't have a good CD ripper or PSP video converter? Click on the link below to learn more about PSP Video Converters, game downloads, and more for any of your favorite gaming systems.
